Name _____ Date _____

Key Details: Busy Beavers

Read the article. Look back in the text to find each answer.

Example: Q: What is a beaver home called? Key detail: "a home called **a lodge**"

A Read the Article

Busy Builders

Beavers are busy builders. They have strong front teeth that never stop growing, so chewing on wood keeps them from getting too long. Beavers use their teeth to cut down small trees. Then they drag sticks, mud, and rocks into a stream to build a dam. The dam blocks the water and makes a pond. In the pond, beavers build a home called a lodge. The door to the lodge is underwater, which helps keep the beavers safe from animals that hunt them. If a beaver senses danger, it slaps its flat tail on the water to warn its family. Beavers eat tree bark, leaves, and water plants.

1. What do beavers use to cut down small trees?

◯ tails ◯ teeth ◯ feet

2. What does a beaver dam make?

◯ a pond ◯ a river ◯ a nest

B Find It in the Text

3. Name THREE things beavers use to build a dam.

Answer: _____

4. Why is the door to the lodge underwater?

Answer: _____

5. What does a beaver do to warn its family about danger?

Answer: _____

★ Safari Challenge

Why is chewing on wood good for a beaver? Use a detail from the article.

_____
